

Key Clients

Introducing NVCRobotics, where we envision a future in robots driving business efficiency. Experience the power of NVCRobotics as it enhances your customer interactions and effortlessly tackles staffing gaps. With NVCRobotics, you can unlock a new level of customer service and efficiency in the space of your desire. These cutting-edge robots are designed to seamlessly navigate crowded spaces, serving your needs with precision and grace. Our cutting-edge serving robot solution is meticulously crafted to maximize operational efficiency and streamline workflow. Embrace the trend toward automation and efficiency by joining NVCRobotics. Allow us to demonstrate how our robotic solutions can propel your business to thrive in today's dynamic world and prepare to redefine excellence in hospitality with our game-changing NVC Robotics.

PUDU

HolaBot
 A Delivery Robot That Features
 Pager and Notifications

Functions

Industry-leading SLAM Technology

The PUDU SLAM system makes it easy for robots to find their way in complex indoor environments

Four Core Functions

Centimeter-level real-time positioning, high-precision mapping, optimal route planning, and instant response for obstacle avoidance

Pudu Scheduler System

Independently developed the distributed Pudu Scheduler system, comprehensively upgraded the multi-machine collaboration capability

Long Battery Life

4-hour full charge and continuous operation for up to 10~24 hours (Replaceable Battery)

Pudu Cloud Service

Visual business management, automated operation and maintenance, scenario data collection, and cloud intelligent service

HolaBot Specifications

Dimension	1226×541×531mm
Machine Weight	60kg
Machine Material	ABS engineering plastics/Aviation aluminium alloy
Charging Time	4.5H
Battery Life	10~24H (Replaceable Battery)
Cruise Speed	0.5~1.2m/s (Adjustable)
Load Per Tray	15kg

Pudu Watch Features

Ingress Protection	IP66
Communication Mode	4G
Battery Life	24H (Stand-by 72H)

Large Volume, High Capacity

With a maximum payload of 120L and 60kg, HolaBot is a powerful deliverer in the workplace

Pager Function

HolaBot supports pager functions and can be called from 4G watch or Pudu App, ensuring to be "At The Service" all the time

Waterproof Inner Cabin

IPx5 waterproof inner cabin can effectively resist liquid spillage while working and keep the machine body clean

Voice Control

Omnidirectional six-mic array supports HolaBot to locate sound source and recognize voices in real time, enabling the voice control function and a hand-free experience
